

Bountiful Neighborhood Emergency Preparedness Committee

Shelter-in-Place Plan:

Sheltering-in-place (SIP) is when our household, during an emergency, chooses a room to remain in for safety until professional responders inform us that it is safe to come out or evacuate. Often this is for a chemical or industrial emergency. We also sometimes need to shelter-in-place when we lose utilities in in cold or hot weather.

1. The room where our household will shelter in place is
 - a. During cold weather: _____
 - b. During warm weather: _____
 - c. During chemical emergencies: _____

2. During cold weather, our household will do this to create warm rooms.

3. During hot weather, our household will do this to create cool rooms.

4. During chemical emergencies, our household will do this.

5. Our SIP kit is located here: _____

6. Remember this:
